

## 20. Poster presentation - habitat protection Port Campbell Discovery Walk

### Aim

Students prepare a poster to show the different habitats in the Discovery Walk area at Port Campbell National Park and some habitat protection management practices.

### Materials

- Poster paper A2.
- Your notes from the pre-visit activities.
- Data collected during fieldwork.
- Line drawing pens.
- Coloured pencils.
- Computer and word processing/ graphics software (if available).

### Activities

Prepare a poster using text and images to convey habitats and habitat protection management practices along the Discovery Walk area.

The poster should have at least four sections.

#### a. Location

Include a map of the Discovery Walk.

#### b. Climate

Include a climate graph of the location.

#### c. Contrasting habitats

Include a summary and comparison of the three Environment Summary Sheets from your fieldwork.

Add a sketch or photograph of each of these sites.

Include your sketch of Two Mile Bay and a brief description of the different habitats that exist here.

#### d. Management Strategies

Include a list or sketch of all management strategies noted on the field trip.

How might these help the flora and fauna of this area?

Are there any ways they might be a problem for flora and fauna, particularly in terms of increased visitor access?
