

Mount Worth State Park

Visitor Guide

Situated on the western rim of the Strzelecki Ranges, Mount Worth State Park encompasses 1,040 hectares of Mountain Ash forest and regenerating native bush.

Location and access

Mount Worth State Park is situated approximately 125 kilometres south east of Melbourne. The park is reached from the Princes Highway at Warragul by following the Warragul – Korumburra Road, Grand Ridge Road and McDonalds Track. Alternatively the park can be reached from Darrum via the Darrum – Allambee Road and the Allambee Estate Road. Roads throughout the area are narrow and winding with gravel surfaces but offer marvellous scenery with panoramic views.

Walking

A network of walking tracks radiates from the Moonlight Creek picnic area. Raincoats and boots are a wise precaution as you are in a wet mountain forest with a average rainfall of about 2000mm.

1. Giant's Circuit – 1.8 kilometres, 1 hour return
Commencing at the Moonlight Creek picnic area this trail follows the route of a timber tramway through Mountain Ash Forest and fern filled gullies. This lovely walk includes the impressive Standing Giant, a huge Mountain ash with a girth of 7 metres and probably 300 years old.

2. Moonlight Circuit – 8.5 kilometres, 3 hours return

Commencing at the Moonlight Creek picnic area, this walk combines Moonlight Creek Track and Moonlight Divide Track to form a walking circuit. It is a strenuous walk suitable for more experienced walkers. The Moonlight Divide Track climbs steeply to the ridge and leads through regenerating Mountain Ash forest with a dense understorey of Dogwood, Daisy Bush and Blackwood. Moonlight Creek Track follows a trickling mountain stream through lush fern gullies, to the sites of old timber mills.

3. Gardiners Mill Track – 1.5 kilometres one way, 1 hour return

This walk is an extension of the Giant Circuit and takes you through regenerating Mountain Ash forest and along the tree-fern lined Clark Creek.

4. Maslin's Mill – 800 metres one way, 40 minutes return

Commencing at the far end of the Moonlight Creek picnic area this track meanders through forest of Mountain Ash and Blackwood to Maslin's Mill site. Suitable for people with limited mobility.

Picnicking

The grassy flats and tree ferns at Moonlight Creek provide a delightful setting for a picnic. Tables, fireplaces and toilets are provided. Camping is not permitted within the park.

Remnants of history

Between 1860 and 1862, Surveyor George McDonald and his small team surveyed and cut a track through the thick forests of the Strzelecki Ranges from Lang Lang to Moe. Mount Worth is the highest point on the track.

During the 1870s selectors pegged out blocks on McDonalds Track, toiled to clear paddocks and build huts. During the 1920s, 12 timber mills operated on the slopes around Mount Worth to strip it of its valuable timber. Relics of the timber industry remain in the park including saw dust heaps, an old mill boiler and the formation of tramways used to haul timber to and from the mills.

The Warragul Field Naturalists Club and the Shire of Warragul were instrumental in having the park created to protect an example of the wet forests originally widespread in the Western Strzelecki Ranges. The park now encompasses 1,040 hectares.

A haven for plants and animals

Mount Worth State Park protects a remnant of the forests that once covered the western Strzelecki Ranges. Tall wet forests of Mountain Ash, Mountain Grey Gum and Blackwood grow on the hills and slopes. Soft Tree-ferns and Rough Tree-ferns flourish within the sheltered gullies. The cool moist conditions support a number of rare plants including Netted Brake, Slender Tree-fern and Skirted Tree-fern.

Caring for the environment

Help us look after your park by following these guidelines:

All native plants and animals in the park are protected

Please keep to designated walking tracks to avoid becoming lost

Bins are not provided within the park. Please take your rubbish home

Camping is not permitted in the park

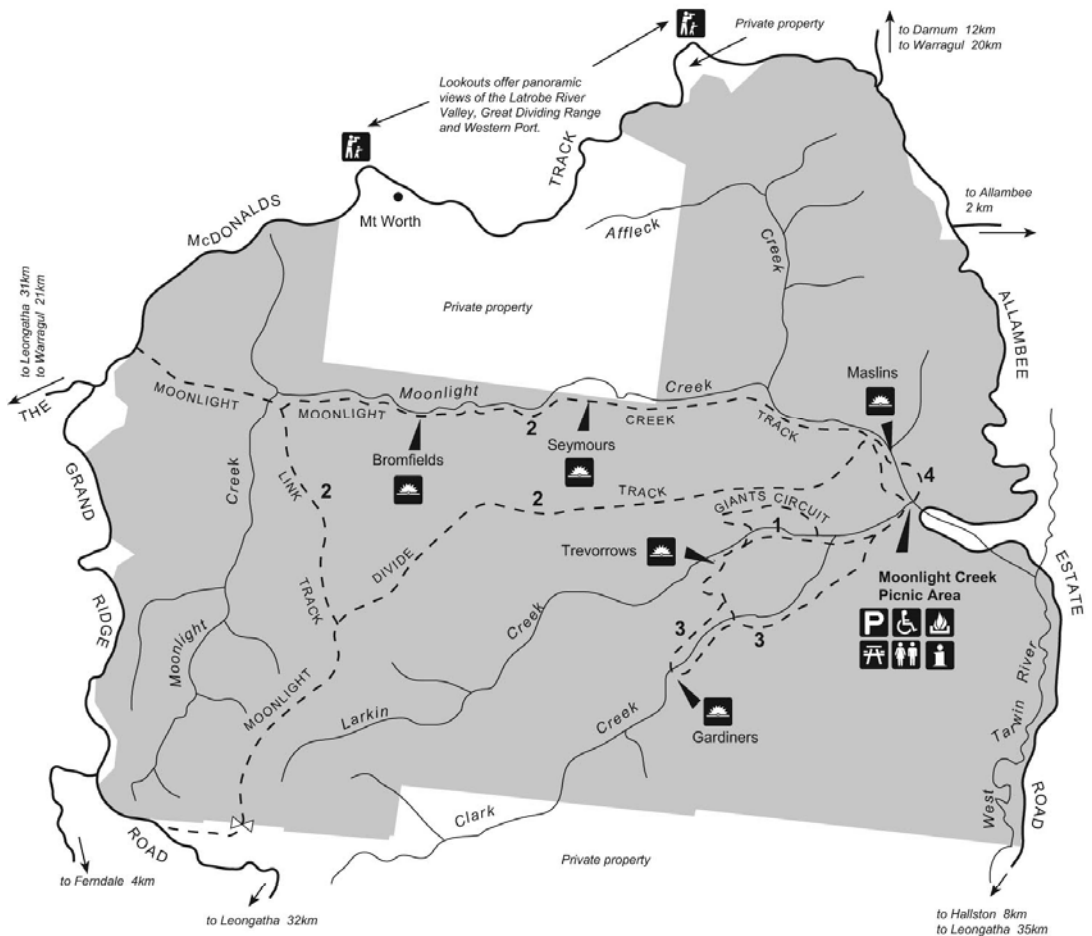

Cats and dogs are not permitted in the park

Fires may only be lit in the fireplaces provided. No fires to be lit on days of Total Fire Ban (Eastern District)

Please don't throw this park note away. Keep it, return it for others to use, or recycle it

A major program of planting Mountain Ash, Mountain Grey Gum and Manna Gum is in progress to restore pastures to forest. So far 150,000 seedlings have been planted and other areas directly seeded.

Birdlife is abundant within the park. Lyrebirds scratch amongst the leaf litter, while forest canopy provides food and nesting areas for the Crimson Rosella, King Parrot, Olive Whistler, Grey Butcherbird, Tawny Frogmouth and the rare Sooty Owl. The park is also home to such animals as the Common Wombat, Swamp Wallaby, Brush-tailed Possum, Feathertail Glider, Brown Antechinus and Platypus.
